asTech Driven by Repairify | OPUS IVS | ADAS MAP -PRO

Advanced Repair Planning for ADAS MAP Users

Less manual entry. More consistent estimates.

ADAS MAP PRO simplifies the estimating process by bringing together the ADAS information and resources needed to build a more complete repair plan.

REPAIR PLANNERS

Transfer selected ADAS operations into CCC estimates without manually recreating estimate lines.

SHOPS

Make it easier to account for required ADAS work, helping ensure critical operations are documented and completed.

MSOs

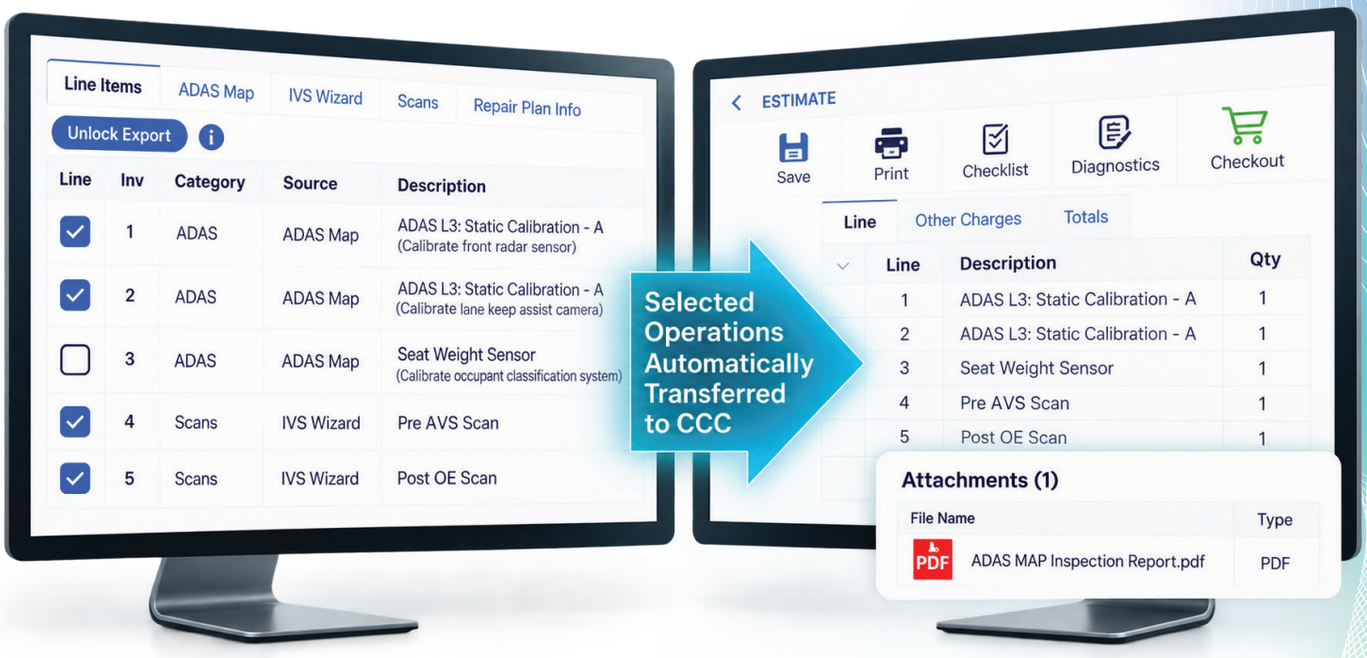

Promote consistent repair planning and documentation practices across your organization.
