CarDAQ NXT

Collision Diagnostics. A Clear Next Step.

CarDAQ NXT walks your team through vehicle identification, repair details, and scanning or service requests. Instead of choosing from a broad application menu, follow a guided process that helps you reach the appropriate next step.

Identify the vehicle

Capture the VIN and decoded year, make, and model.

Add the repair details

Enter repair order and insurance information as part of the guided workflow.

Follow the next step

Access supported IVS scans, OE scans, and additional service requests through the guided workflow.

Visit us at booth #33063

A Consistent Process for Your Team

Consistency across locations:

A common sequence helps teams follow a consistent diagnostic process.

Compact for everyday work:

A 5-inch screen gives shops a smaller device option within the NXT family.

Clear next steps:

A DriveSafe-style wizard guides technicians through scanning and service requests.

Connect access

Scan the on-screen QR code to open Connect on your phone or compatible device.

Shop connectivity

Connects through your shop's internet to access supported diagnostic and remote services.

Connected reporting

Supports Connect portal and CCC integrations. Report and invoice delivery depend on your shop's configuration.
